

QUALIFICATION INFORMATION SHEET

ABC Level 2 Award in Converting Biomass into Fuel and Energy	
Purpose and Aim of Qualification	In this qualification learners will develop an understanding of technology to supply wood fuel according to specification, at a consistent rate, using equipment safely and with respect to sustainability and the environmental footprint. They will also learn how to grow and harvest biomass fuel safely and develop an understanding of boiler technology to convert wood fuel to energy.
Additional Benefits to Learners	This Award could lead to learners completing other related Awards in ABC's Sustainable Energy suite of qualifications. Learners could also progress onto the ABC Level 2 Certificate in Sustainable Energy qualification or onto related Level 3 qualifications. This Award has been included as specialist learning within the Engineering Diploma.
Job Role	Electrical Engineering Technician Electricity Generation Worker
Rules of Combination	This Award has two mandatory units
Recommended GLH	90
Assessment	This award is internally assessed, internally and externally moderated
Age Ranges	Pre 16 P
	16 – 18 P
	19+ P
Unit Titles	Fuel Supply Technology – Biomass Fuel Converting Biomass to Energy and Power
Qualification Type	Vocationally – Related Qualifications
Qualification Subject Area	QCA Sector is Environmental Conservation ABC Awards Sector is Landbased/Environmental
Qualification Ref No.	TBA on accreditation
Marketing of the Qualification	ABC Awards will use a variety of methods, these include: <ul style="list-style-type: none"> • Flyers and newsletters • Published specification • Network meetings / launches • Business Development Manager visits to centres
Notes	This qualification has been accredited by QCA for accreditation for inclusion on the National Qualifications Framework. Accreditation start date is 1 st April 2008.
Administering Office	Chorley
